

Name:

Quiz 9

1. (15pts points) What production level will maximize profits for a company with cost and demand functions

$$C(x) = 3800 + 5x - \frac{x^2}{1000}, \quad \text{and} \quad p(x) = 50 - \frac{x}{100}.$$

Be sure to verify that you have indeed found a maximum.
